Volume 28 Author and Subject Index

A
ACT test, 227, 247, 274
Armstrong, R.D., 147
automated test assembly, 147

B
balanced incomplete block design, 317
Bayesian inference, 110
Bayesian procedure, 295
behavioral decision making, 186
Beretvas, S.N., 25
Berger, M.P.F., 72
bookmark difficult location, 25
Brennan, R.L., 274

C
calibration, 72, 219
Carlson, J.E., 317
CAT item selection, 165
Chen, P.-H., 295
comparability, 219
computer software, 141, 143
computerized adaptive testing, 147, 165, 295
concordance, 186, 219, 227, 247, 274
conjoint analysis, 186
consumer psychology, 186
continuous-response scale, 95

D
Davis, L.L., 165
DeMars, C.E., 48
DeSarbo, W.S., 186
DETECT, 3
differential item functioning, 450
dimensionality assessment, 3
DIMTEST, 3
Dorans, N.J., 216, 227

E
educational testing, 227, 247, 274, 317
equating, 219, 227, 247, 274
equipercentile methods, 247
expected a posteriori estimation, 126
exposure control, 165

F
Ferrando, P.J., 95, 126
fit, 48

G
Galliano Hollman, F., 186
generalized graded unfolding model (GGUM), 48
generalized Mantel-Haenszel method, 450
generalized partial credit model, 165, 389
group invariance, 274

H
Hanson, B.A., 215, 247
Harris, D.J., 247
HCA/CCPROX, 3
Hemker, B.T., 332
hierarchical cluster analysis, 332
Huitzing, H.A., 355

I
inequality constraints, 110
infeasibility, 355
IRTFIT_RESAMPLE, 143
ITED test, 274
item calibration, 72
item characteristic function, 95
item exposure control, 165
item fit index, 48
item mapping, 25
item response theory (IRT), 3, 25, 48, 72, 95, 110, 126, 143, 147, 295, 332, 389

Applied Psychological Measurement, Vol. 28 No. 6, November 2004, 481–483

©2004 Sage Publications

item sampling, 355
item selection, 165, 332

J
Jones, D.H., 147

K
Kahraman, N., 407
Kamata, A., 407
Karabatsos, G., 110
kernel smoothing, 95
Kolen, M.J., 219, 274
Koppel, N.B., 147

L
latent class analysis (LCA), 141
Lehmann, D.R., 186
Likert scales, 48
linear programming test assembly (LPTA), 355
linking, 216, 219, 227, 247

M
Mantel method, 450
mathematical programming, 355
maximin design, 72
maximum likelihood estimation, 186
mixed integer programming, 317
mixture modeling, 141
Mokken scale analysis (MSA), 332
MSP, 3
multidimensional adaptive testing (MAT), 295
multidimensional item response data, 3, 295, 332
multiple-form structures, 147

N
nominal response model (NRM), 72
nonparametric item response theory, 3, 95, 110, 332

O
optimal design, 317
optimal test assembly, 355
order-restricted inference, 110
out-of-scale information, 407

P
partial credit model, 165, 389
Pashley, P.J., 147
Passos, V.L., 72
person-fit indices, 126
person response curve, 126
personality measurement, 95, 126
polytomous IRT models, 72, 165
Pommerich, M., 216, 247
prediction, 227, 247
preference/choice experiments, 186

R
Rasch model, 295
relative efficiency, 72

S
sampling distribution, 427
SAT test, 227, 247
scaling, 219
scaling coefficient, 427
Sconing, J.A., 247
set covering, 355
Sheu, C.-F., 110
Sijtsma, K., 3
simulations, 407
Stone, C.A., 143
structural change models, 186
Su, Y.-H., 450
subscale scores, 407

T
test design, 355
test equating, 227, 247, 274
Type I error, 48

U
unfolding, 48
unidimensional adaptive testing, 295
unidimensional item response data, 3, 110

V
van Abswoude, A.A.H., 3, 332
van der Ark, L.A., 3, 332
van der Linden, W.J., 317
van Onna, M.J.H., 427
Veldkamp, B.P., 317
Vermunt, J.K., 332
von Davier, M., 389

W
Waller, N.G., 141
Wang, W.-C., 295, 450

Y
Yamamoto, K., 389
Yin, P., 274
